ث. ک اگر $A + uv^T$ وارنبل پذیر باشد.

$$(A + uv^T)^{-1} = \bar{A} - \frac{\bar{A}uv^T\bar{A}}{1 + v^T\bar{A}u}$$

باید $(A + uv^T)(\bar{A} - \frac{\bar{A}uv^T\bar{A}}{1 + v^T\bar{A}u}) = I$

سبب $A\bar{A} + uv^T\bar{A} - \frac{A\bar{A}uv^T\bar{A} + uv^T\bar{A}uv^T\bar{A}}{1 + v^T\bar{A}u} = I + uv^T\bar{A} - \frac{uv^T\bar{A} + uv^T\bar{A}uv^T\bar{A}}{1 + v^T\bar{A}u}$

$$= I + uv^T\bar{A} - \frac{u(1 + v^T\bar{A}u)v^T\bar{A}}{1 + v^T\bar{A}u} = I + uv^T\bar{A} - uv^T\bar{A} = I \quad \checkmark$$
